Forecast for Sunday 22 Jan 2023

Weather: Low level freezing fog at first in the east likely to be slow to clear, but a dry day for most with some increasingly hazy bright spells due to thickening high cloud. Becoming milder.

Chance of cloud-free hill tops above 600m: Close to 100%

Low cloud and visibility: Lifting fog may briefly produce patchy cloud below about 450m in the east, but generally little or no cloud expected below the summits. Visibility good or very good, but very poor in any lifting freezing fog.

Forecast for Monday 23 Jan 2023

Weather: In the east, a few early mist and fog patches, then a bright day with some hazy sunshine at times. In the west, cloudier perhaps with the odd spot of drizzle.

Maximum wind: Southerly or southwesterly generally less than 10mph

Chance of cloud-free hill tops 600m: Close to 100% in east, but 70% in west

Low cloud and visibility: Patchy cloud above 600-800m in west, lifting fog may briefly produce patchy cloud below about 450m in the east. Visibility good or very good, but very poor in cloud or low level freezing fog.

Temperature: **Valleys:** Around Zero Celsius at dawn in east, but nearer plus 2 in west, rising to plus 5 or 6 Celsius by day
At 600m: Plus 2 or 3 Celsius
Freezing level: Around 500-600m, but higher in the west and lower in the east.
